

Jeffries Technology Solutions Welcomes Dean Rakoskie

August 25, 2011

Herndon, Virginia– Jeffries Technology Solutions, Inc. (JeTSI) is pleased to announce the addition of Mr. Dean Rakoskie to the JeTSI team as an Aerospace Senior Systems Engineer.

Mr. Rakoskie has made a career of combining technical engineering with spot on business strategies to achieve and surpass revenue goals. He has been an independent consultant, a program manager and company executive at SAIC, and a military officer. While at SAIC, he established a division providing systems engineering and integration services. Revenue grew from \$2M to \$20M in six years. Prior to that, as the Program and Technical Leader, he managed a \$40M, 15-year development of an O&M initiative in support of a new space program.

Mr. Rakoskie served in the United States Air Force for twenty years. During one of his tours of duty he was the Senior Government Engineer responsible for all activities associated with activating, initializing, sustaining, and maintaining a \$500M defense facility.

As a senior systems engineer in both the public and private sector, Mr. Rakoskie has provided strong technical leadership, implementing processes and developing requirements documents for ground system architectures. He has also conducted and evaluated major program reviews.

A strategic and results oriented engineer, Mr. Rakoskie has a record of achieving corporate and contractual goals. True to his high energy and pursuit of excellence characteristics, he completed the rigorous requirements necessary to receive the Professional Engineer designation.

“Mr. Rakoskie will be another advantageous resource on the JeTSI Team,” said JeTSI President, Alan Jeffries, “He brings system engineering talents, leadership skills, and business acumen to the table. We are thrilled with the strong team we are developing at JeTSI.”

JeTSI is a woman-owned engineering consulting firm specializing in the aerospace industry. It provides diverse services in systems engineering and architecture, program management, software development, and custom hardware solutions.
